ALUMINUM COMPANY OF CANADA, LIMITED AND SUBSIDIARY COMPANIES

Notes to Financial Statements

1. Principles of Consolidation:

The consolidated financial statements include the accounts of the Company and its subsidiaries (which are all fully owned) comprising Alcan Jamaica Limited; Chaguaramas Terminals Limited; Demerara Bauxite Company, Limited; Kitimat Terminals Limited; Newfoundland Fluorspar Limited; Saguenay-Kitimat Company; Saguenay Shipping Limited; Saguenay Shipping (U.K.) Limited; Saguenay Terminals Limited; The Roberval and Saguenay Railway Company and Alcan Design Homes Limited.

All intercompany items and transactions, including profits in inventories, have been eliminated.

Accounts, other than Canadian currency accounts, included in the consolidated balance sheet are translated into Canadian dollars at rates of exchange current at 31st December 1962, except that (a) certain bank balances, inventories, investments and fixed assets with related reserves are at rates determined at dates of acquisition, and (b) debts not maturing within one year are at rates current at dates of original borrowing except that the first mortgage 3½% sinking fund bonds, due 1974, payable in United States currency, are stated on a dollar for dollar basis.

2. Inventories of Aluminum, Materials and Supplies:

Inventories, as summarized below, are stated at lower of cost or market.

	1962	1961
Aluminum.....	\$ 56,675,718	\$ 63,288,753
Raw materials.....	60,009,921	57,921,443
Supplies.....	15,912,453	14,457,797
	<u>132,598,092</u>	<u>135,667,993</u>
Deductions for advance payments from customers against aluminum held for future delivery.....	8,728,000	26,347,716
	<u>\$ 123,870,092</u>	<u>\$ 109,320,277</u>

3. Lands, Plants, Riparian Rights, and Facilities, at Cost:

	1962	1961
Land and water rights.....	\$ 34,200,603	\$ 34,220,710
Mineral properties, rights and development.....	11,193,944	10,512,252
Buildings, machinery and equipment.....	1,205,726,040	1,179,865,479
Uncompleted facilities.....	46,894,613	46,896,296
	<u>1,298,015,200</u>	<u>1,271,494,737</u>
Construction work in progress.....	16,490,865	13,395,734
	<u>\$1,314,506,065</u>	<u>\$1,284,890,471</u>

The expenditure for uncompleted facilities represents the cost of certain smelter facilities in British Columbia the construction of which was suspended in 1957.

Capital projects envisaged for the next few years are expected to involve the expenditure of about \$31 million during 1963.

4. Depreciation Policy and Reserve for Future Income Taxes:

With minor exceptions, depreciation recorded in the accounts is calculated on a straight-line basis in respect of all completed facilities and the uncompleted facilities in British Columbia referred to in Note 3.

Income tax regulations in Canada, and in certain other countries, permit the use (for the purpose of determining income taxes) of various forms of capital cost allowances which do not coincide with the amount of depreciation recorded in the accounts. These allowances generally exceed straight-line depreciation during the early life of new assets and later fall short of it.

When capital cost allowances utilized for determining income taxes exceed straight-line depreciation, an amount equivalent to the resultant reduction in current income taxes is charged to income and credited to Reserve for Future Income Taxes. When the allowances so utilized fall short of straight-line depreciation, resulting in higher current income taxes than would otherwise be payable, an appropriate portion of the reserve is transferred back to income.

6. Dividend Restrictions:

Pursuant to the provisions of certain debt issues, approximately \$133 million of earned surplus at 31st December 1962 is not available for payment of cash dividends on the common stock.

Earned surplus at 31st December 1962 also includes \$10.4 million, representing the par value of the Company's preferred shares purchased for cancellation since 1946 (\$1.4 million in 1962), which, under the requirements of the Companies Act of Canada, has been designated as capital surplus (previously shown separately) and is not available for the payment of dividends on the common stock unless certain formalities are observed.

8. Commitments:

A consolidated subsidiary company, Saguenay Shipping Limited, has charter hire commitments amounting to \$12.9 million in 1963 (\$20.5 million paid in 1962), \$9.5 million in 1964, \$6.8 million in 1965, \$3.7 million in 1966, \$2.7 million in 1967, \$2.6 million in 1968 and lesser amounts up to 1975.

The Company has undertaken to purchase annually until 1973 certain quantities of semi-fabricated metal from Alroll Inc., an affiliated company. Under normal operations, Alroll's revenue from metal purchases contracted for by the Company and by other customers will be sufficient to enable it to meet all its obligations, including the service of its debt. However, to enable Alroll to service its debt, the Company could be required, under certain exceptional circumstances, to advance to Alroll maximum annual amounts estimated at \$4.5 million in 1964 and lesser amounts through 1972 without obtaining an equivalent value in metal.

See also reference to capital expenditure program in note 3.

9. Statutory Information (parent and subsidiaries):
